

# THE COLLEGIAN

source for news at Southwestern College

The rare occasion of the moon passing through the Earth's shadow occurred in the early morning hours of October 8, beginning at 4:15 a.m. and ending at 6:24 a.m. Instead of being completely dark, the moon was illuminated by a reddish-brown light, earning it the name "Blood Moon." It was the final total lunar eclipse for 2014.
